

ChatGPT Prompts to Get Keywords for Instagram Posts, Carousels, and Reels

STEP ONE:

I'm creating a reel for Instagram for my audience of <INSERT WHO IS YOUR SPECIFIC TARGET AUDIENCE FOR THIS POST>. In this post I'm talking about <INSERT WHAT YOUR POST IS ABOUT>. Can you give me some possible keyword phrases that might work well that all start with, "How to..."?

STEP TWO:

Can you take all these keyword phrases and work the BEST ones, naturally, and conversationally into a caption I can share with this content?
